wonderful to have you here.

the studio represents my offered services for you and showcases my portfolio. during my creative process i love to work out your needs to the fullest potential and get on the journey together with you to find them. i love sending your message out to the world with a design based on the look, feel and function the way you see yourself. embracing and empowering true authenticity is my main goal in everything i do. my vision is to quickly direct what the soul tells you, so my design approach is to have a dialogue with you before and while processing. i also like to encourage you to tell me about your message you'd love to send. my services for you reaching from a professional term like designing a new logo that reflects your values, illustrating your wildest dreams up to a more personal portray for someone you deeply care about. my work is for everyone who loves simplicity and loves to empower themselves or other. „stay careful for the mindful“ is not just a claim to go to, its a promise to you that my work is only done until your soul and intension really shines through in every detail. so i feel very delighted to invite you to

stay careful for the mindful

A handwritten signature in black ink, appearing to read 'Peligate' with a stylized flourish at the end.

my services

my service focus is to be put on logo design, line art illustrations and creation of portraits. i also offer my work in photography.

i am always open to any ideas regarding my other styles such as spraypaint, comic line or etching style and i look forward to any new artistic or creative challenge.

for vectorizing my work i collaborate with graphic designer/artist mia vogl (mogl art), who offers her service on a stand alone basis.
